Summary

Computer Science and Data Science student graduating May 2027 with experience building artificial intelligence (AI) applications, including LLM/RAG systems, multi-agent workflows, data pipelines, REST APIs, and AWS-based automation. Developed tested AI systems using Python, FastAPI, LangGraph, ChromaDB, and Qdrant while coordinating delivery across 15+ client projects.

Education

Bennett University (The Times Group) **Greater Noida, India**
B.Tech in Computer Science and Engineering, Specialization in Data Science *Expected May 2027*

Technical Skills

Programming & Data: Python, SQL, Pandas, NumPy, Pydantic, PostgreSQL, data cleaning, data validation, data quality, document ingestion, data extraction
AI & LLM Systems: Machine Learning, Generative AI, LLM applications, RAG, agentic workflows, NLP, transformers, embeddings, vector databases, prompt engineering, grounding, provenance, AI guardrails, AI evaluation
Frameworks & Infrastructure: FastAPI, LangGraph, LangChain, ChromaDB, Qdrant, Redis, SQLAlchemy, Streamlit, Docker, GitHub Actions, AWS EC2, Git
Software & Delivery: Software development, REST APIs, CI/CD, automated testing, debugging, QA/UAT, requirements analysis, technical documentation, stakeholder communication, cross-functional delivery

Experience

Convrse Spaces (Magicbricks, The Times Group) **India**
Tech Product Management Intern *May 2026 - Aug 2026*

- Designed and implemented an AWS EC2, ADB, and Scrcpy remote-diagnostics proof of concept for deployed Android media players, enabling remote screen access, application actions, and real-time log capture.
- Led AI-assisted automation of SSH-tunnel setup, device discovery, and diagnostic checks for an audit workflow previously requiring 3 team members for approximately 90 minutes, a 4.5-person-hour manual baseline per cycle.
- Coordinated delivery and closure of 15+ real-estate client projects across a 7-8-member technical team, 3D, and sales; managed requirements, priorities, timelines, dependencies, feedback, risks, and escalations.
- Tested Convrse Connect and documented happy-path workflows, performance findings, and deployment-readiness recommendations for engineering follow-up.

Projects

ProdIntel AI | *Python, FastAPI, PostgreSQL, ChromaDB, Streamlit* **May 2026 - Present**

- Built a four-stage AI decision-intelligence pipeline that converts uploaded stakeholder feedback into ranked recommendations with source-level provenance and an explainable `/why` API.
- Implemented deterministic grounding, provenance, conflict, and RAG citation validation; shipped a no-key Streamlit demo with multi-format ingestion and verified the system with 569 offline tests.

Multi-Agent Research Pipeline | *Python, FastAPI, LangGraph, Qdrant, Docker* **2026**

- Built a Planner-Researcher-Critic-Writer workflow with parallel research, Qdrant semantic caching, confidence-based retry routing, and cited report generation using Tavily and arXiv evidence.
- Packaged the FastAPI service with Docker and CI, added evaluations for groundedness, coverage, latency, token usage, and cost, and verified the mock-mode pipeline with 61 offline tests.

Certifications

AWS Certified Solutions Architect - Associate | **Text Mining and Analytics (UIUC)**

Databases and SQL for Data Science with Python (IBM) | **Algorithmic Toolbox (UC San Diego)**

Introduction to Bayesian Statistics | **HelloPM AI Builder Sprint 2026** (Credential ID: KUXRWL)

Leadership

Head of Design, International Affairs Society, Bennett University Sep 2024 - Jul 2025
Directed branding and campaign design in collaboration with content, event, and management teams; received a Letter of Recommendation.
